Hi, I am
Lautaro Cantero

Full Stack Developer with over 3 years of experience in designing, building, and maintaining web solutions across diverse industries. Specialized in developing dynamic and scalable interfaces, performance optimization, and clear documentation to enhance team collaboration. Focused on code quality, accessibility, and user experience, applying best practices such as robust validations, internationalization, and unit testing. My goal is to deliver efficient, maintainable solutions that create real impact in projects.

Professional Experience

Vilotech

Full Stack Developer

2026 - present

- Focused on improving the visual and technical experience of sports web applications and Chrome extensions by correcting styles and inconsistencies, reorganizing views, and applying accessible and responsive final designs.
- Implemented form validations to ensure data integrity, documented components with clear examples in Spanish and English, and added multilingual support through i18n.
- Optimized performance using lazy loading and memoization techniques, developed endpoints to connect functionalities with the database, and built reusable components with routes and continuous improvements aimed at efficiency and usability.

Codetria

Front End Developer

2021 - 2025

- Worked as a Front End Developer creating web solutions for the hospitality and banking sectors, building dynamic interfaces with React and working with AWS-based infrastructure. Also responsible for support, maintenance, and continuous improvements on websites.
- Contributed mainly by developing reusable components with React and TypeScript, correcting styles and reorganizing views across different environments. Implemented routes with complete CRUDs, form validations, internationalization, unit tests, and performance optimizations to ensure a smooth and consistent experience for both users and hotel staff.
- Key technologies used during this job were React, TypeScript, Sass, Bootstrap, Jest, React Testing Library, AWS, and Git.

Skills

- Front End: React · TypeScript · JavaScript · HTML5 · CSS · Sass · Tailwind · Bootstrap .
- Back End: Node.js · PHP · C# · SQL .
- Tools: Git · Linux .
